

MLPC Expands Laser Welding Services

MIAMISBURG, Ohio—May 8, 2006--Mound Laser & Photonics Center, Inc. (MLPC) has added helium leak and mechanical testing to its services for laser welding. These services ensure hermetic and mechanically sound laser welds for critical applications. The helium leak and mechanical testing augment MLPC's 4-axis Nd: YAG laser welding stations. MLPC provides a full range of services including joint design, material selection, and weld validation, which compliment the prototype to production laser welding capability.

Mound Laser & Photonics Center, Inc. is a laser materials processing technology company specializing in contract manufacturing services in laser welding, laser marking/engraving, and laser micromachining as well as contract research and development.
