

MLPC Adds Picosecond Laser Micromachining

Miamisburg, Ohio – July 20, 2006 - Mound Laser & Photonics Center, Inc. (MLPC) has expanded its services with the addition of a picosecond laser micromachining system. The combination of high power, high repetition rate, and multiple wavelengths make it a flexible system capable of processing a range of materials. MLPC is the first contract manufacturing shop in the United States to offer services on this state of the art laser system. Services being offered include contract application development and contract manufacturing. All contract services are supported by MLPC's industry leading research team.

Mound Laser & Photonics Center, Inc is a laser material processing technology company offering contract R&D and contract manufacturing in laser marking/engraving, laser welding, and laser micromachining.
